

Siderúrgica
Sevillana S.A.

Sustainable Steel

Sustainable Steel

Committed to the construction sector so that, together, we can build a future of sustainable growth.

A true push for innovation to reduce risks and improve the impact of our industrial activity, eliminating inefficiencies and, above all, guaranteeing more sustainable steel for your company and society, with an overall positive impact on the environment.

Siderúrgica Sevilla was one of the first steel factories to obtain the Steel Sustainability Mark, the RSE certification verified by the Spanish Standardisation and Certification Association (AENOR), awarded to steel factories that voluntarily employ a responsible management method as a standard of the sector, applying social and environmental values to their business activities.

Siderúrgica Sevillana guarantees fulfilment of 56 new indicators obtained from 150 responsible management parameters, based on Corporate Social Responsibility (CSR) standards and incorporated into the life cycle of the steel through the implementation of a Steel Sustainability Management System (SGSS) and exceed the requirements of current legislation.

What does Sustainable Steel mean?

Guaranteed correct choice

Siderúrgica Sevillana offers you the peace of mind of steel backed up by all guarantees and having a supplier in your value chain that goes beyond legislation, and, through self-regulation, offers an unprecedented increase in quality standards in the sector.

Risk-free

Siderúrgica Sevillana guarantees transparency and traceability, allowing for the construction of a sustainable product life cycle and thus reduce the risks involved in the use of the product.

Committed to the right choice

With the Steel Sustainability Mark, Siderúrgica Sevillana manifests its commitment to offer products and services according to social and market demands, thus providing a future of growth to the construction sector.

Aspects guaranteed by the Steel Sustainability Mark:

With the Steel Sustainability Mark, Siderúrgica Sevillana guarantees that its steel products simultaneously comply with the mandatory and voluntary regulatory requirements listed below:

Integrated management systems

- Quality (ISO 9001)
- Environment (ISO 14001)
- Energy (ISO 50001)
- Health and Safety at Work (OHSAS 18001)
- Social Responsibility and Sustainability (SGSS – UNE 36901)

AENOR Mark

- Distinction awarded by EHE and EAE
- Radiological control
- Slag recovery (> 50%)
- Scrap recycling (> 80%)
- Kyoto Protocol

- Statistical control guarantees (Re and Rm)
- Cyclic load (SD steel)
- Fatigue (SD steel)

Environmental declaration of the product (ISO 14025)

LEED CERTIFICATE (ISO 14021)

- Recycling content and use of regional materials certification

ARCER MARK (SD steel)

- Guaranteed tensile deformation diagram
- Civil liability insurance
